SUYASH KRISHNA

SENIOR PRODUCT DESIGNER

suyashkrishna15@gmail.com • (+91) 9620630153 • Bangalore • linkedin.com/in/suyash-krishna/ • Portfolio: https://suyashux.github.io/Portfolio/

Senior Product Designer with 8+ years of experience shaping AI-first and enterprise product experiences across search, discovery, design systems, and complex workflows. Proven track record driving high-impact initiatives at Best Buy, US Bank, and World Bank, including architecting conversational AI features that increased user reach to 79% of unauthenticated web sessions and reduced drop-off by 40%. Winner of the Best Buy Innovation Challenge 2024, combining strategic product thinking, accessibility-first design, and cross-functional leadership to turn emerging AI capabilities and data into intuitive, scalable digital products.

WORK EXPERIENCE

Senior Experience Designer | Best Buy

09/2024 – Present

Agentic AI – AskBlue

- Expanded Ask Blue adoption by designing Progressive Login, removing upfront authentication and opening access to ~79% of previously unrecognized web sessions.
- Shaped Ask Blue's conversational UX by defining 15 customer use cases across product discovery, comparison, configuration, recommendations, and AI guardrails.
- Designed Agentic Attach to reduce incomplete purchases through contextual, confidence-based AI recommendations, supporting Attach Rate, Average order value, and multi-item Add-to-Cart.
- Drove Ask Blue from concept to production, collaborating across Design, Content, Product, and Engineering to deliver scalable experiences across App, Small view, and Web.

Gift Finder Conversational AI

- Led the UX redesign of Best Buy's AI Gift Finder, addressing ~40% landing-page drop-off by replacing a static entry experience with a guided, conversational discovery flow across App, Mobile Web, and Desktop Web.
- Designed AI interaction patterns including progressive response states and contextual feedback to address 8–10sec perceived latency, improving transparency and user trust during AI-powered gift recommendations.
- Introduced "Top Mentions" inline review summaries, eliminating the need for a mandatory Product details page (PDP) visit during initial product evaluation and reducing friction within the conversational shopping journey.
- Architected personalized, cross-platform gifting experiences spanning campaign entry, smart sharing, and contextual gift profiles across 3 platforms, enabling personalized discovery based on recipient, occasion, budget, and interests.

Other projects

- Designed a Design System adoption dashboard to measure component usage, identify legacy patterns, and provide teams with actionable insights into design-system adoption and organizational impact.
- Designed interactive MapView components integrating geolocation, GPS tracking, location-based services, marker clustering, responsive rendering, and real-time data visualization to deliver scalable, user-centric mapping experiences for delivery agents.
- Designed an end-to-end 3rd party marketplace warranty experience across post-purchase touchpoints, integrating coverage details, warranty status, and actionable information across confirmation email, purchase history, and order details experiences.

Senior Experience Designer | Cognizant

09/2022 – 08/2024

- Developed a smooth dashboard experience for US Bank employees adhering to brand guidelines and design systems, engaging in extensive stakeholder management and client interactions.
- Created a web application to optimize the QA process via Azure DevOps for World Bank's QA team.
- Spearheaded collaborative ideation workshops and iterative feedback reviews across cross-functional teams to align strategy and design execution.
- Leveraged proficiency in tools like Figma, Adobe XD, Adobe After Effects, and Illustrator across projects.

UX designer | Accenture

04/2019 – 07/2020

- Redesigned core Electronic Health Record (EHR) clinical workflows, reducing data-entry errors and streamlining clinician navigation across key modules.
- Participated in daily stand-ups and documentation updates to ensure seamless alignment across cross-functional teams.
- Performed error checks, debugging, and defined critical edge cases for the testing team to enhance product quality.

QA Engineer | Accenture

03/2016 – 04/2019

- Tested the healthcare application and ensured that it was developed as per design requirements.
- Worked closely with product owners, developers, and design teams to ensure seamless delivery and alignment.

TECHNICAL SKILLS

- Design Systems Architecture
- User Experience Research & Testing
- Product Strategy Development
- Data-Driven Design Decision Making

- High-Fidelity wireframing, Accessibility-First Design
- Cross-Platform Design Optimization
- Stakeholder management, Design critique facilitation, A/B Testing
- Figma
- AI-Assisted Design Workflows, Figma make, Claude, Github copilot, VS code

EDUCATION

Master of Design

Indian Institute of Information Technology, Design and Manufacturing, Jabalpur | 2020–2022 | CGPA 8.0

Bachelor of Engineering

JSS Academy of Technical Education, Bangalore | 2011–2015 | Aggregate 70%

ACHIEVEMENTS

- **Winner** of the **Best Buy Innovation Challenge 2024**, recognized for an innovative, user-centric solution.
- **Authored various research papers in the field of information system design, human factors and ergonomics:**
  – Ergonomic Study in information system design of two major railway platforms of India. (Link)
  – Analysis of secondary tasks performed and psycho social factors of railway loco pilots. (Link)
  – Occupational ergonomic study on the control panel of WAP7 locomotive & design intervention on Indian railway. (Link)
